

ELEVATION STONE

STONE THAT SHAPES THE WAY WE LIVE.

THE COLORADO WALL & NATURAL STONE COLLECTION / 2026

Architectural design concept

Geology.
With good taste.

The stone sets the tone. The details make it yours.

Limestone that quiets a space. Bluestone that brings depth. Granite with real presence. Build an outdoor palette that connects the house, the landscape and the way you live.

This collection pairs Colorado design inspiration with practical formats, finishes and fabrication guidance. Start with a material. Carry it through paving, walls, steps and the final edge.

04 The Colorado Wall Portfolio

17 Indiana Limestone

22 Pennsylvania Bluestone

27 American Granite

33 Wisconsin Stone

39 Kansas Limestone

41 The Broader Collection

43 Pool & Patio Stone

48 The Pool Builder Collection

59 Details & Specification

64 Veneer & Sill Directory

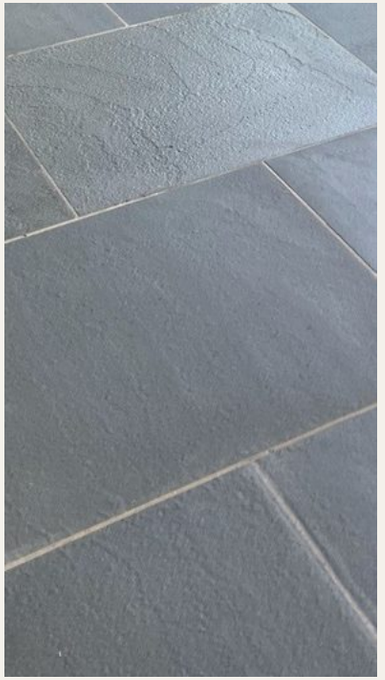

Five foundations. Endless possibilities.

Begin with the character of the stone, then refine the scale, texture and edge.

01 / Indiana Limestone

Warm mineral texture. Quiet architecture.

02 / PA Bluestone

Blue-gray depth. Natural movement.

03 / American Granite

Crystalline grain. A commanding presence.

04 / Wisconsin Stone

Layered walls. Sculptural landscapes.

05 / Kansas Limestone

Cream and buff. Substantial forms.

Images combine supplier photographs and architectural design concepts. Approve physical samples for actual color, finish and natural variation.

Walls make the place.

Landscape walls. Architectural veneer. Outdoor rooms with a point of view.

KANSAS LIMESTONE

INDIANA LIMESTONE

WISCONSIN STONE

AMERICAN GRANITE

A new Colorado design portfolio: photo-real concepts informed by stone references, alongside clearly identified supplier photography later in this section.

KANSAS LIMESTONE WALLS + POURED CONCRETE

Room for the view.

Generous stone courses anchor a foothills terrace. The quiet concrete field lets the split-face limestone, native planting and stepped wall heights do the work.

COLORADO DESIGN CONCEPT

KANSAS LIMESTONE CLADDING + CONCRETE PAVERS

A reason to stay outside.

Carry warm limestone onto the fireplace and seat walls. A restrained paver field adds rhythm underfoot while the broad caps connect every stone surface.

COLORADO DESIGN CONCEPT

INDIANA LIMESTONE GARDEN WALLS + NATURAL STONE PATIO

A garden room in the city.

A Denver brick-home setting brings the material into everyday life. Capped piers, low seating walls and coordinated cut paving make a small courtyard feel complete.

COLORADO DESIGN CONCEPT

INDIANA LIMESTONE ARCHITECTURE + POURED CONCRETE

From facade to courtyard.

Fine-jointed cut stone creates a quiet architectural plane. Repeat its tone in the planter wall, then give the masonry room to breathe against simple concrete.

COLORADO DESIGN CONCEPT

The craft is in the continuity.

Supplier project photographs / real masonry and cut-stone details; project locations are not represented as Colorado.

Landscape scale.

Split-face garden walls create shadow, texture and a comfortable enclosure. Broad caps and deliberate piers make the transitions feel finished.

Architectural precision.

Cut stone can connect wall planes, stair treads, sills and entry details. Resolve the joint rhythm and every exposed return before fabrication.

Published Indiana coping and cap dimensions are in the technical collection. Architectural cladding and special shapes are quoted to the approved cut schedule.

AQUA GRANTIQUE WALLS + CONCRETE PAVER PATIO

Texture with an edge.

Dark split faces and quartz movement give the wall weight. Warm greige pavers and a narrow charcoal border keep the foreground composed and inviting.

COLORADO DESIGN CONCEPT

CAMBRIAN CREAM WALLS + PENNSYLVANIA BLUESTONE PATIO

Light stone. Strong landscape.

Pale sawn-height wall stone stands against blue-gray paving. The same broad stone language carries into the steps and planted grade changes.

COLORADO DESIGN CONCEPT

Natural texture you can build a design around.

Aqua Grantique / supplier project photography paired with the new Colorado design portfolio.

A face with real movement.

The reference shows the split-face relief, dark slate-blue color and quartz character that make Aqua Grantique distinctive.

A deliberate horizontal rhythm.

Published sawn heights are 3 1/2 or 7 1/2 in. (+/- 1/2 in.). Nominal 8 in. depth describes front-to-back dimension.

Complete the landscape.

Coordinate the wall with substantial steps, selected boulders and a cap profile. Review the actual range sample and a masonry mockup.

Supplier project photograph / the Colorado concepts are illustrative; natural variation and installed appearance are established by the selected material and workmanship.

CHARCOAL GRANITE WALLS + POURED CONCRETE

A stronger edge to the landscape.

Crystalline grain, rugged split faces and substantial caps make a powerful contrast with a quiet concrete plane. Let planting soften the meeting of stone and grade.

COLORADO DESIGN CONCEPT

GARRISON GRANITE VENEER + CONCRETE PAVER PATIO

The wall becomes the architecture.

Silver-gray ashlar wraps the outdoor room and repeats at the seat wall. Simple paving and timber give the natural granite texture a clear role in the composition.

COLORADO DESIGN CONCEPT

Read the grain. Shape the space.

Material reference and design concept / choose the stone, finish and wall assembly together.

GARRISON / SUPPLIER MATERIAL REFERENCE

Fine scale. Big presence.

Ashlar veneer brings real split granite texture to a facade or properly designed seat-wall substrate. It is a cladding layer, not the retaining structure.

For full-depth granite landscape walls, use the wall-block program and its project-specific design. Review corner units, cap dimensions and the proposed joint treatment.

Left: Colorado design concept. Upper right: supplier granite material photograph. Review physical samples in the actual proposed finish.

One palette. Two different jobs.

Connect the appearance while specifying each wall assembly for its actual function.

Full-depth landscape stone

The stone has physical depth and mass. Retaining work needs a designed foundation, drainage and an assembly suited to the height and site loads.

Veneer and cut-stone cladding

The stone finishes a supporting wall. Specify the substrate, attachment or mortar system, flashing, drainage and required clearances with the design team.

The visible texture can be coordinated across the site. Do not substitute a veneer piece for full-depth retaining stone based on appearance alone. Concept imagery.

INDIANA LIMESTONE / THE SIGNATURE COLLECTION

Quiet by nature. Extraordinary by design.

Soft buff, cream and gray. Fine fossil character. Indiana Limestone gives contemporary spaces warmth and traditional homes an effortless sense of permanence.

Colorado design concept / Elevation Indiana Limestone

Give the ground a beautiful rhythm.

Elevation Indiana Limestone - Full Color Blend / dimensional paving

FORMAT	AVAILABLE OPTIONS
12" widths	12 x 12, 12 x 18, 12 x 24, 12 x 36 in.
18" widths	18 x 18, 18 x 24, 18 x 30, 18 x 36 in.
24" widths	24 x 24, 24 x 30, 24 x 36 in.
XL formats	24 x 48 and 36 x 36 in.; 1 1/4 in. limestone thickness
Standard paving	1 1/4 in. thickness published; confirm selected finish and series
Nominal sizing	Example: 12 x 24 in. nominal = 11 5/8 x 23 5/8 in. actual

Published dimensional program: Full Color Blend. Sizes are subject to current production; other Indiana selections require a separate fabrication quote.

TECHNICAL SOURCE >

A lighter palette. A richer result.

Website selections / review the full physical color range before specifying.

Full Color Blend

A naturally mixed composition of buff, cream, tan and gray. Use the blend to add life to a large uninterrupted terrace.

Fossil Beige

A warm website selection for a softer architectural palette. Confirm the specific quarry range, finish and cut program with our team.

Standard Gray

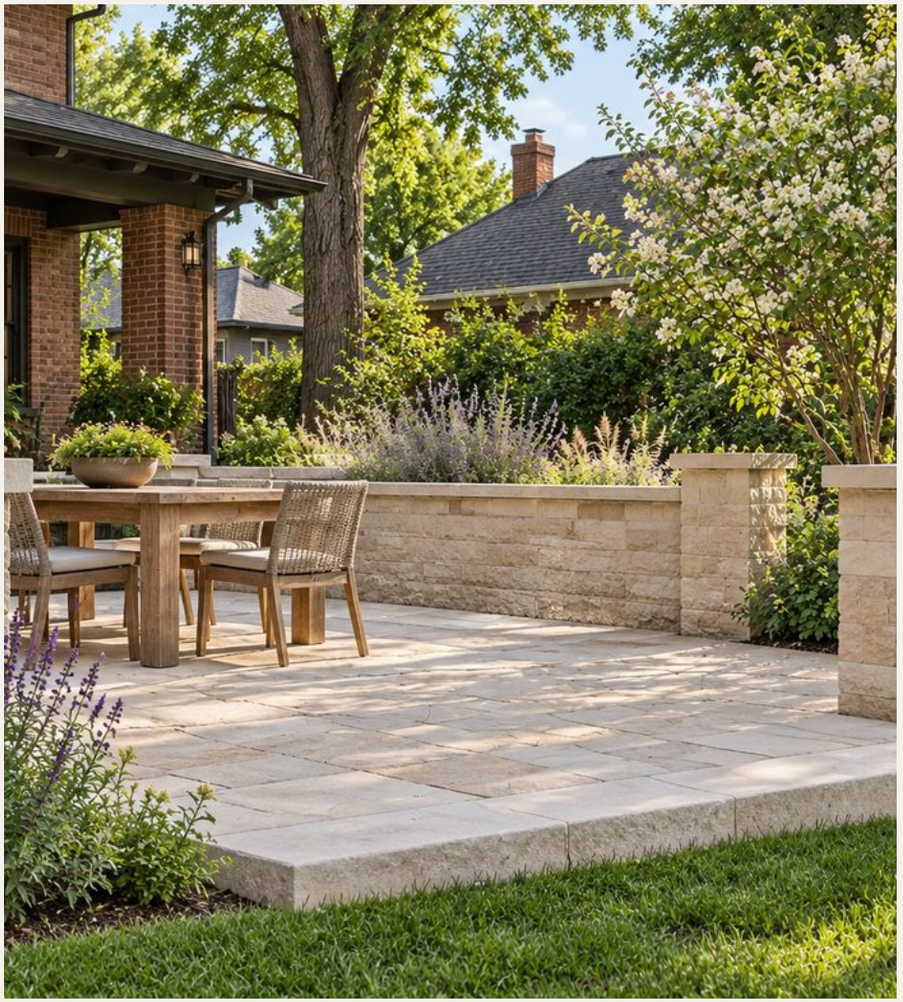

A cooler website selection that pairs beautifully with dark metal and pale masonry. Quote sizes and finishes for the selected material.

Full Color Blend finish options: smooth, antique, bush-hammered and sandblasted. Finish availability is material-specific; images are design concepts.

TECHNICAL SOURCE >

Carry the stone to the edge.

Coordinated limestone details for pools, garden walls and outdoor rooms.

Repeating the same stone at the pool edge, seat wall and stair landing creates a complete material story. Resolve the transitions before ordering.

FORMAT	AVAILABLE OPTIONS
Bullnose coping	13 1/8 x 48 x 2 1/4 in.
Chamfered coping	12 x 24 x 2 1/4 in. or 16 x 24 x 2 1/4 in.
Wall caps	12 x 24 x 2 in.; smooth top, split-face edge
Architectural cuts	Sills, pier caps, treads and special shapes: quote to drawings
Detail to resolve	Edge profile, returns, overhang, drip detail and exposed faces

Listed coping and cap sizes apply to the published Full Color Blend program. Fabricated corners, radii and oversized pieces are project-specific.

TECHNICAL SOURCE >

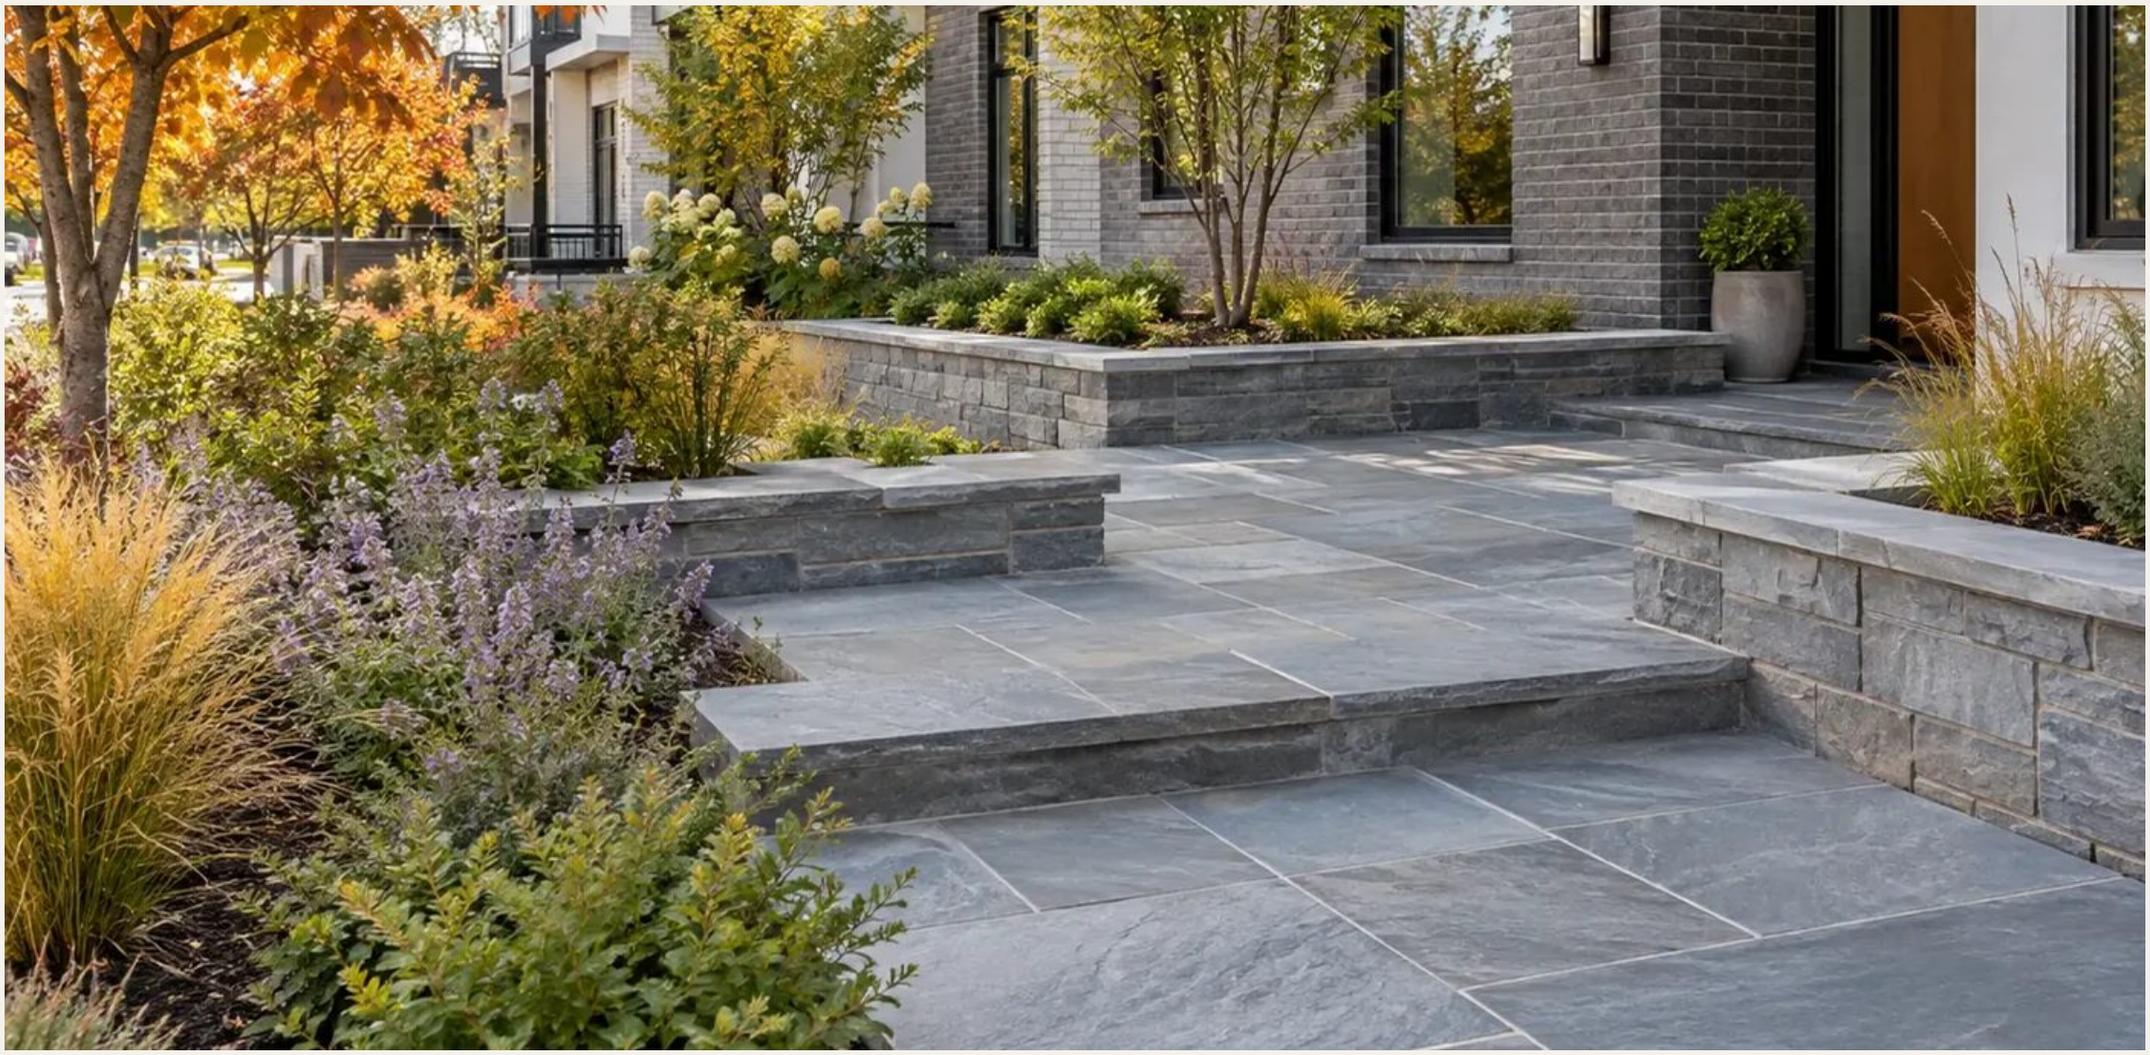

PAVING / VENEER / GARDEN WALLS / CUSTOM CUTS

One stone.
A complete outdoor room.

Pair broad paving with a textured garden wall, a substantial cap and precisely cut entry details. Let a restrained material palette make the architecture feel stronger.

Supplier project reference / architectural stone options vary by selected collection

PENNSYLVANIA BLUESTONE / A NATURAL ORIGINAL

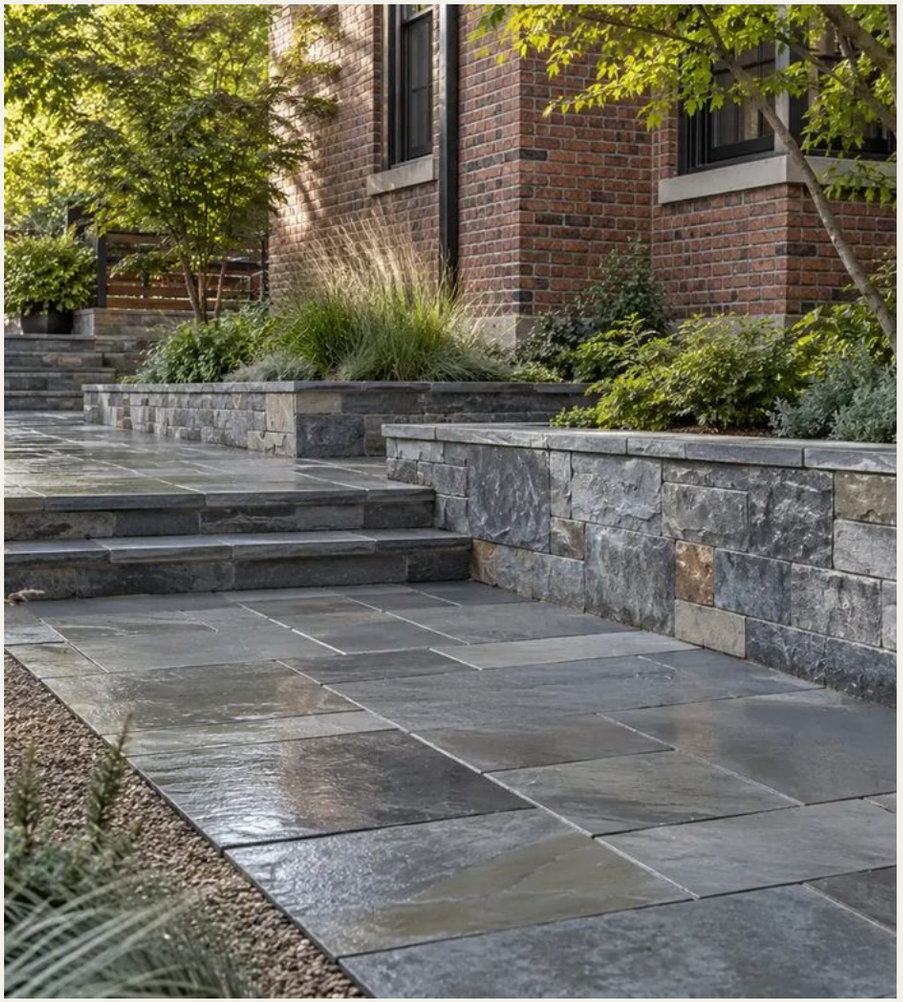

Depth. Texture. A little drama.

Blue-gray tones, layered texture and a beautifully grounded presence. Pennsylvania Bluestone moves easily from a classic garden walk to a crisp contemporary terrace.

Colorado design concept / thermal dimensional bluestone

Precision, with natural character.

Thermal and natural-cleft formats for patios, walks and carefully detailed outdoor rooms.

FORMAT	AVAILABLE OPTIONS
Common pattern cuts	12 x 12, 12 x 18, 12 x 24, 18 x 18 in.
Larger pattern cuts	18 x 24, 18 x 36, 24 x 24, 24 x 36 in.
Size range	Published range: 12 x 12 to 24 x 36 in., in 6 in. increments
Thickness program	1/2, 1, 1 1/2 and 2 in. series; confirm format and application
Natural-cleft tolerance	Thickness can vary +/- 1/4 in.
Pallet options	Single-size pallets or mixed-size pallets; confirm mix and coverage

Stone thickness and support must be selected for the actual use. A thin flooring format is not an automatic substitute for an exterior landscape paver.

TECHNICAL SOURCE >

Choose the texture. Set the mood.

The finish changes the way light moves across the stone.

Thermal

Sawn to a controlled thickness, then heat-textured. A crisp choice for long sightlines, contemporary detailing and coordinated steps.

Natural cleft

Split along the stone's natural layers. More variation in relief and thickness; ideal when the design calls for an expressive surface.

Irregular

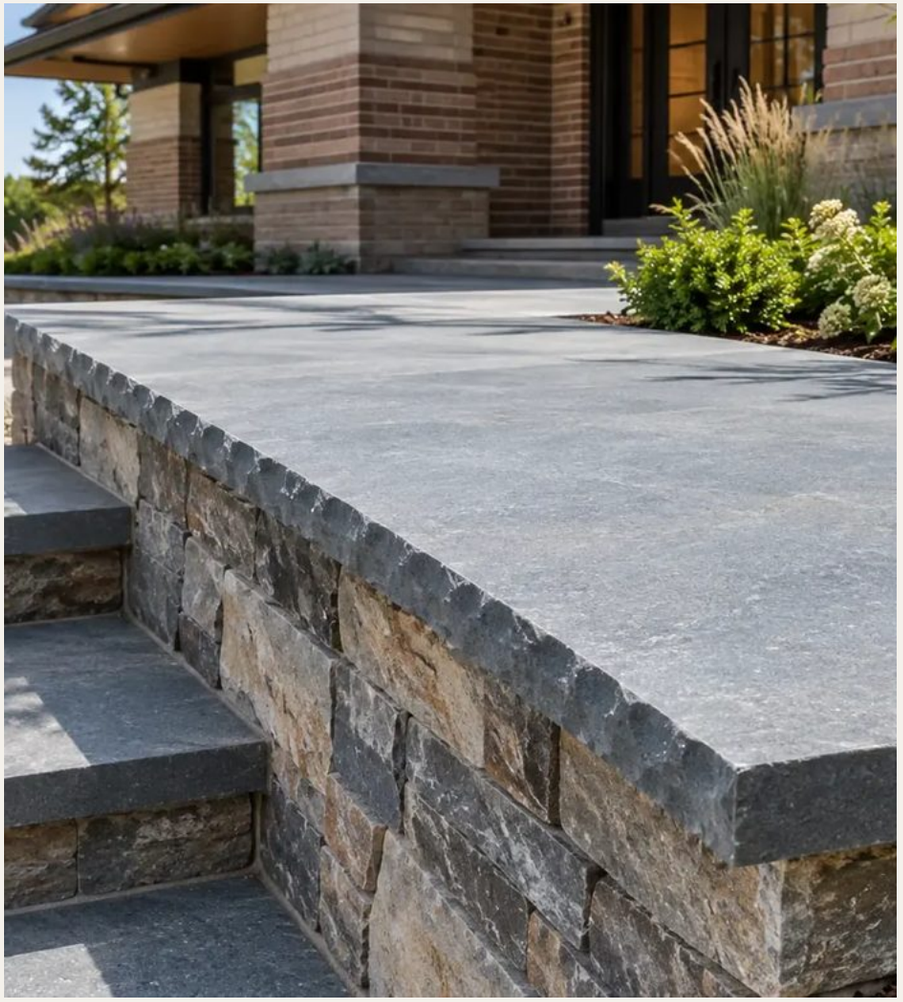

Organic outlines with a relaxed rhythm. Use the shape deliberately and coordinate joint widths, edge cuts and planting transitions.

Blue, Full Color and Lilac are published natural-cleft color options. Thermal includes Blue and Full Color; confirm finish-specific selection. Concept imagery.

TECHNICAL SOURCE >

Make the edge as good as the field.

A coordinated step, wall cap or pool edge brings the paving into focus.

FORMAT	AVAILABLE OPTIONS
Tread lengths	2, 3, 4, 5, 6, 7 and 8 ft.
Tread thickness	1 1/2 or 2 in.; widths quoted to the project
Standard tread finish	Thermal top and one long edge
Edge options	Thermal, eased, rockfaced or bullnose; confirm profile
Fabrication slabs	48 x 96 in.; 1 1/2, 2 or 3 in. thick
Slab color ranges	Blue, Full Color or West Mountain

Confirm actual cut dimensions, corner conditions, exposed ends and lifting access. Pattern paving and fabricated tread dimensions may follow different sizing rules.

TECHNICAL SOURCE >

DIMENSIONAL / IRREGULAR / TREADS / COPING

From the first step to the last terrace.

Carry blue-gray paving through generous landings and strong horizontal caps. Use warmer wall stone and planting to create contrast without losing the calm of a coordinated palette.

Colorado design concept / material pairing inspiration

AMERICAN GRANITE / PAVING & ARCHITECTURAL STONE

Stone with presence.

Crystalline grain, substantial forms and powerful color. American granite creates outdoor spaces with a deliberate sense of permanence, from a residential entry to a civic plaza.

Colorado design concept / Mesabi Black granite palette

Seven ways to make a statement.

Genuine supplier material photographs / the selected finish changes apparent color and texture.

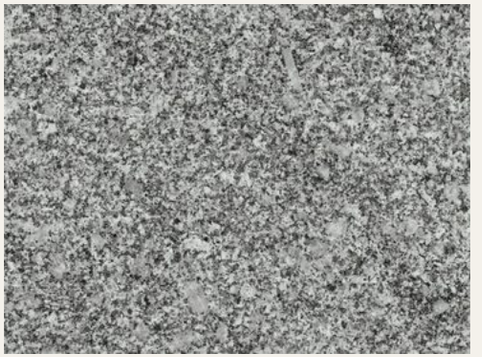

Academy Black

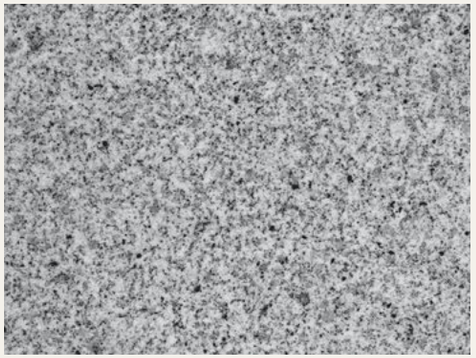

Charcoal Black

Mesabi Black

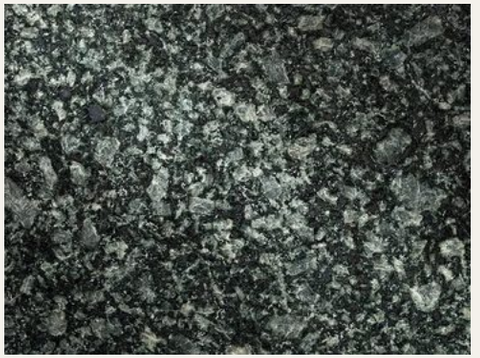

Iridian

Sierra White

Carnelian

Lake Superior Green

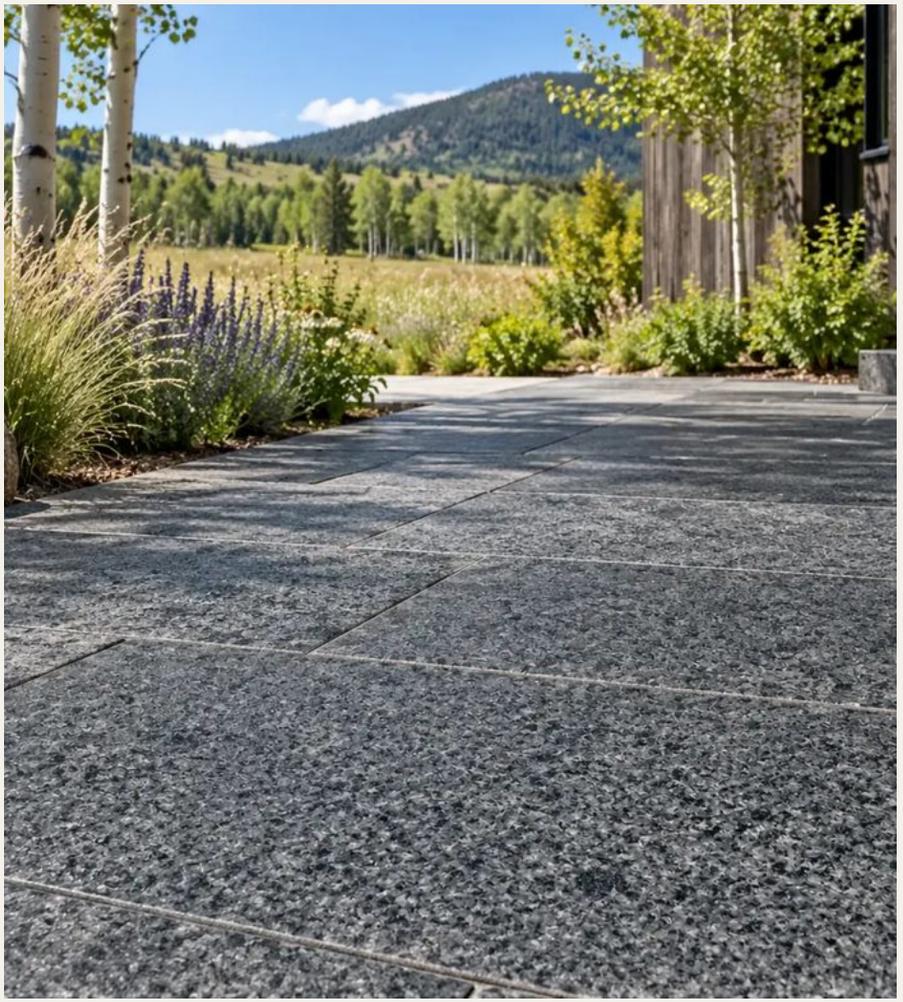

Choose the stone and finish together.

Request a range sample in the proposed exterior finish. A polished sample will read differently from thermal, textured or split stone.

These seven website selections are a starting palette. Quarry-run paving and wall products may offer a different current color range.

Go bold. Get the details right.

Split-edge granite paving / published sizes and custom fabrication options.

FORMAT	AVAILABLE OPTIONS
Standard face sizes	4 x 4, 8 x 4, 8 x 8 and 12 x 12 in.
Thickness options	1 3/16, 2, 3 1/8 or 3 7/8 in.; +/- 1/8 in.
Custom face sizes	Published custom range: 3 1/4 x 3 1/4 to 24 x 24 in.; confirm color
Top finish	Thermal/flamed; Mesabi Black uses Diamond 10 for this program
Split-edge joints	Published recommended joint: 3/4 in.
Larger cut-to-size work	Slabs, planks, treads and curbs: project-specific fabrication quote

The split-edge program is quarry-run and depends on available production stock. Do not assume every swatch is available in every standard size or thickness.

TECHNICAL SOURCE >

Substantial by design.

Three-way split granite wall blocks / a tactile edge for residential and commercial landscapes.

FORMAT	AVAILABLE OPTIONS
Standard footprint	14 x 10 in.
Two block heights	3 7/8 or 6 1/8 in.; +/- 1/8 in.
Approximate unit weight	50 lb / 77 lb respectively
Pallet quantities	54 / 36 blocks respectively
Approximate coverage	22 sq. ft. of wall face per pallet
Finish and caps	Hydraulically split face; custom caps quoted separately

Quarry-run color availability varies. Wall height, loads, drainage, foundation and reinforcement require project-specific design; a block size is not a wall-height rating.

TECHNICAL SOURCE >

Real granite. Rich architectural texture.

A selection from the website veneer library. Compare the actual stone and joint treatment.

Babbitt

Dark gray and black / natural split.

Sentinel

Green-gray / natural split.

Garrison

Light to medium gray / natural split.

Luxemburg

Silver-gray / dark mineral flecks.

Pantown

Mortar-set ashlar / silver-gray.

Odessa

Warm red-brown / natural split.

Website veneer program: 3/4-1 1/4 in. thickness; flat lengths 3-16 in. Confirm individual coursing, setting and corner packaging. Concept imagery.

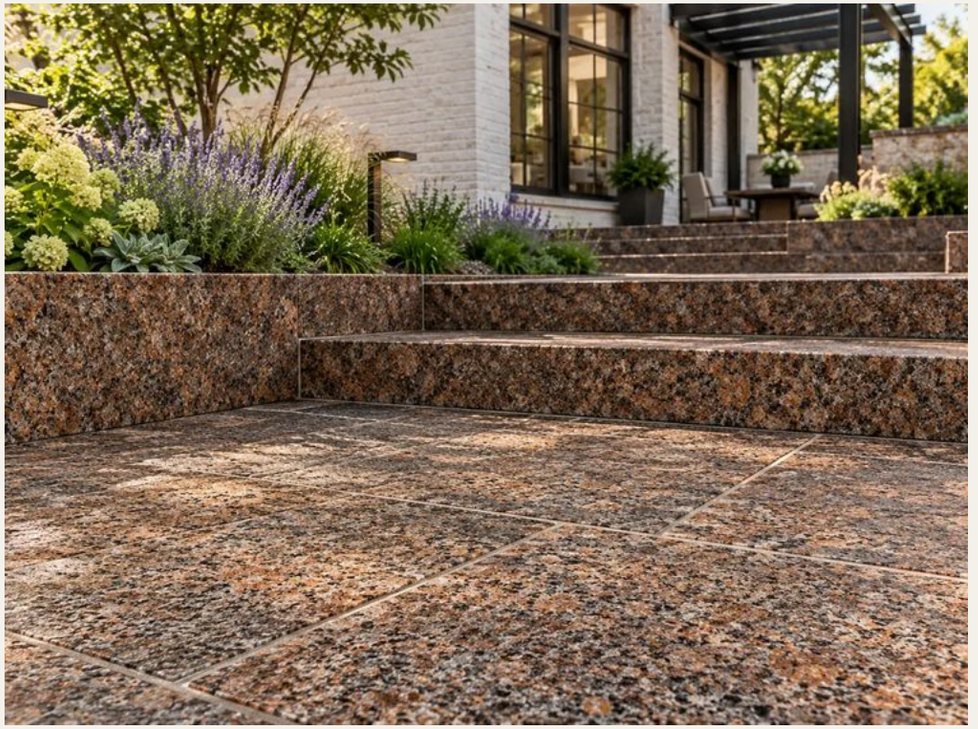

A little contrast goes a long way.

Use granite as a complete field or a deliberately restrained accent.

Light. Precise. Architectural.

Sierra White creates a bright mineral field against rich foliage and dark metal. Keep the paving module generous and the surrounding palette simple.

Warm. Textural. Grounded.

Carnelian brings red-brown energy to paving and substantial steps. Consider it where warm masonry and weathered timber already set the tone.

Colorado design concepts / stone, finish, edge and installation must be specified together.

WISCONSIN STONE / THE TEXTURE COLLECTION

Let the landscape show its strength.

Dark quartz character. Creamy sawn courses. Weathered brown edges. Wisconsin stone offers a remarkable vocabulary for walls, steps, architecture and sculptural landscape work.

Colorado design concept / Aqua Grantique landscape wall

Two strong personalities. One precise rhythm.

Nominal 8 in. depth means front-to-back dimension, not wall height.

Aqua Grantique

DETAIL	OPTIONS
Palette	Charcoal / slate blue; quartz, rust or green veining
Heights	3 1/2 or 7 1/2 in.; +/- 1/2 in.
Lengths	10-30 in., variable ends
Face coverage	Approximately 14-16 sq. ft. per ton

Cambrian Cream

DETAIL	OPTIONS
Palette	White / cream; tan or orange veining
Heights	3 1/2 or 7 1/2 in.; +/- 1/2 in.
Lengths	10-30 in., variable ends
Face coverage	Approximately 16-18 sq. ft. per ton

Split, broken or sawn ends give the installer flexibility. Tumbled options may be available. Coverage is approximate and depends on joints and stone selection.

TECHNICAL SOURCE >

The warm side of a stone wall.

Natural faces, horizontal layers and colors that settle beautifully into planting.

Sandy Creek

Buff, cream and tan. 8 in. depth; height ranges 2-3, 3-4, 4-5, 5-6 and 6-8 in. Approx. 22-24 sq. ft. per ton.

Highland Brown

A weathered brown face for an earthy garden palette. Quote height sorting, depth and the proposed blend; orient the natural face outward.

Chestnut

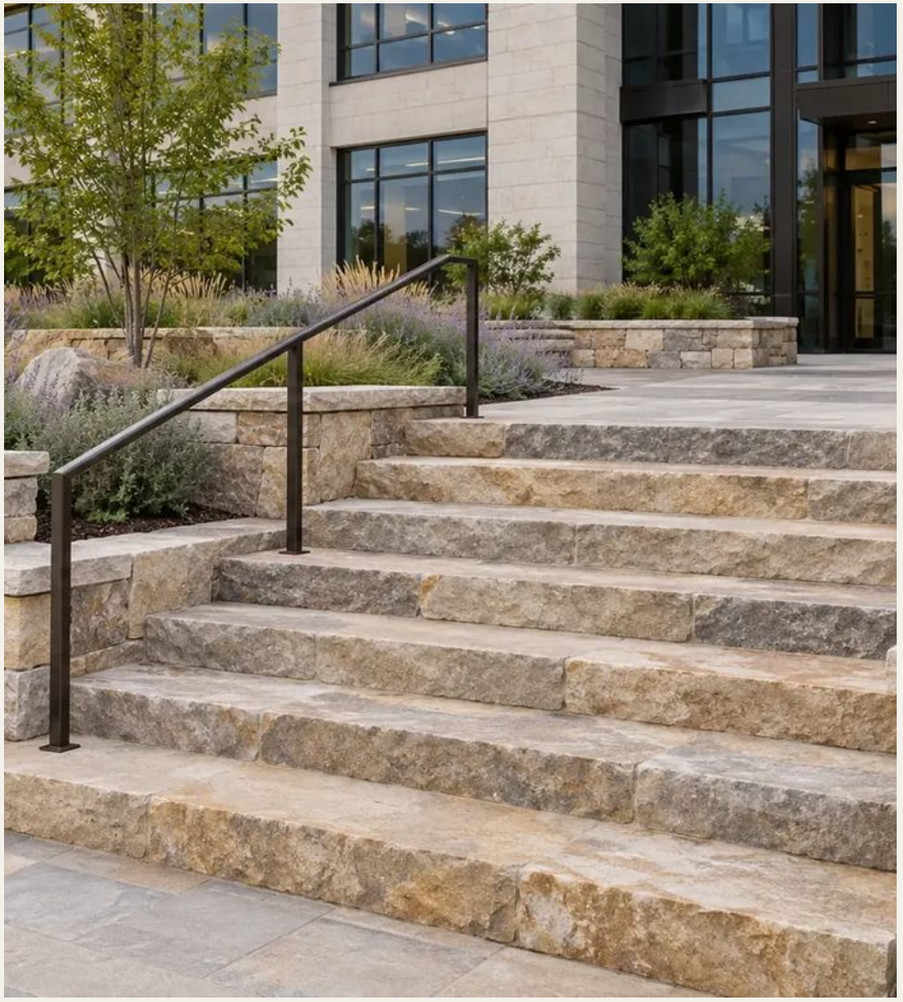

Chocolate and coffee tones. 8 in. depth; 3-6 in. thickness with random lengths. Approx. 22-24 sq. ft. per ton.

Wall face coverage varies with stone and construction. Concept imagery; physical range samples and a wall mockup establish the final appearance.

TECHNICAL SOURCE >

Make the approach unforgettable.

Substantial stone steps with split faces, sawn ends and strong landscape proportions.

FORMAT	AVAILABLE OPTIONS
Aqua Grantique	7 1/2 in. thick +/- 1/2 in.; 18 or 24 in. deep
Aqua lengths	3, 4 or 5 ft.; +/- 2 in. lengths; shot-blast surface
Sandy Creek / Highland	5-8 in. random height; 18 or 24 in. deep
Warm stone lengths	3, 4 or 5 ft.; natural top and bottom
WI Granite Boulder	6 in. thick +/- 1/2 in.; 2-3, 3-4 or 4-5 ft. random boulder shapes
Custom steps	Cambrian Cream and other cuts: quote to approved dimensions

Uniform stair geometry, footing, drainage, lifting and the finished elevation must be resolved by the project team. Random-height stone requires careful selection.

TECHNICAL SOURCE >

Texture for the architecture.

Layered veneer and cut stone connect the home to its landscape.

Cambrian Cream

Light cream / sawn-height expression.

Aqua Grantique

Deep tones / quartz movement.

Glacier Bay

Natural variation / ashlar format.

Highland Brown

Warm weathered character.

Chestnut

Rich brown / substantial texture.

Autumn Sunburst

Warm color movement / ashlar.

Sawn heights, ledgerock, palace blends, thin veneer and full-depth work vary by stone family. Request the current product cut sheet for the selected pattern.

Give the landscape a focal point.

One remarkable stone can organize an entire space.

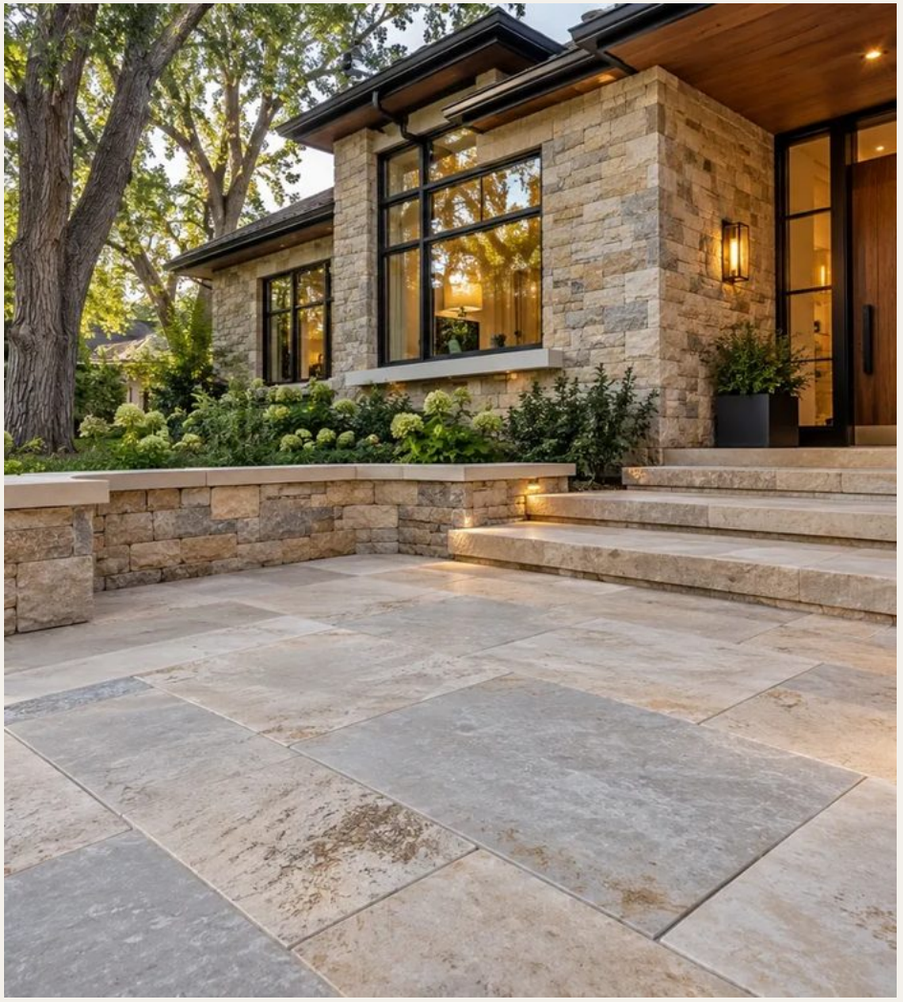

Aqua Blue boulders

Quartz character and sculptural forms. Select individual pieces for visible faces, scale and the intended setting.

Outcropping choices include Aqua Grantique, Chestnut, Desert Blend and Highland Brown. Dimensions and weights vary; select actual pieces and plan equipment access.

Build a wall that belongs.

Elevation Kansas Limestone / dry-stack, wall blocks and custom landscape stone.

Use substantial blocks for a strong horizontal edge, or a smaller dry-stack rhythm for a garden setting. Match the scale of the wall to the house and planting.

FORMAT	AVAILABLE OPTIONS
Published offerings	Dry-stack stone, wall blocks, tumbled stone and sawn slabs
Color direction	Website palette: buff and cream; range approval required
Size availability	Custom quoted by product; no verified item-level size matrix published
Drawing inputs	Height x depth x length, exposed faces and corner conditions
Finish selections	Confirm natural, sawn or tumbled appearance for the exact order
Coordinated details	Caps, steps and cut stone quoted as a complete project package

Kansas limestone wall-block dimensions are confirmed at quotation. No inferred standard sizes are represented here as stocked products.

TECHNICAL SOURCE >

A complete palette. Cut for your project.

Bring the drawings. We will help turn the material into a coordinated package.

01 / Architectural details

Sills, lintels, pier caps and tailored edges. Identify every visible face and finish on the cut schedule.

02 / Landscape elements

Paving, landings, wall caps and substantial step concepts. Confirm bed depth, piece size and handling before fabrication.

03 / A coordinated order

Request stone-range samples and a written cut list with dimensions, tolerances, quantities and lead time.

Custom fabrication is subject to material selection, stone soundness and production capability. Concept imagery is a design direction, not an exact fabrication sample.

TECHNICAL SOURCE >

Stone that feels like home.

Local landscape character, from foothills gardens to modern urban courtyards.

Lyons Red

Warm Colorado sandstone in veneer, flagstone, wall stone and boulder expressions. Choose the face and cut that suit the design.

Aspen Buff

A light, welcoming palette for walls and architecture. Quote the selected ashlar, ledge or veneer format.

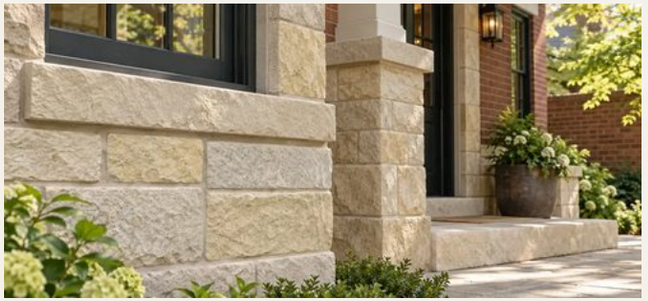

Prairie Gold

Golden warmth with natural variation. Pair with dark metal, soft planting and a restrained paving field.

Other website selections include Milagro and Ptarmigan. Formats and thicknesses vary by stone; request current product dimensions and samples.

Cream. Buff. Beautifully grounded.

Additional website selections for light architecture and warm landscape palettes.

Buff Lueders

Limestone / architectural cut stone.

Cream

Limestone / warm mineral palette.

White

Light limestone / Chateau pattern.

Hampton Limestone

Gray and cream / dimensional character.

Valders Dovewhite

Light dolomitic limestone palette.

Eden

Layered stone / dimensional splitface.

Use the website to explore coordinated families and patterns. Final cuts, thicknesses, stone origin and exterior suitability are confirmed for each selected product.

Design all the way to the water.

Elevation pool stone / coordinated paving, coping, treads and wall finishes.

Deep Blue

A rich blue-gray palette with finish-specific paving sizes from 8 x 16 up to 24 x 48 in.; larger formats are sandblasted only. Paver thickness: 1 3/16 in.

Crema Eda

Warm cream palette; confirm antiqued or sandblasted program.

Carya

Pale gray with cream movement; sandblasted paving.

Avena

Creamy beige and tan; antiqued paving.

Also explore Afyon Cloud, Orcca, Grano, Terra, Takoma, Takoma Silver and Velato. Pool coping dimensions and finishes are quoted by stone and profile.

TECHNICAL SOURCE >

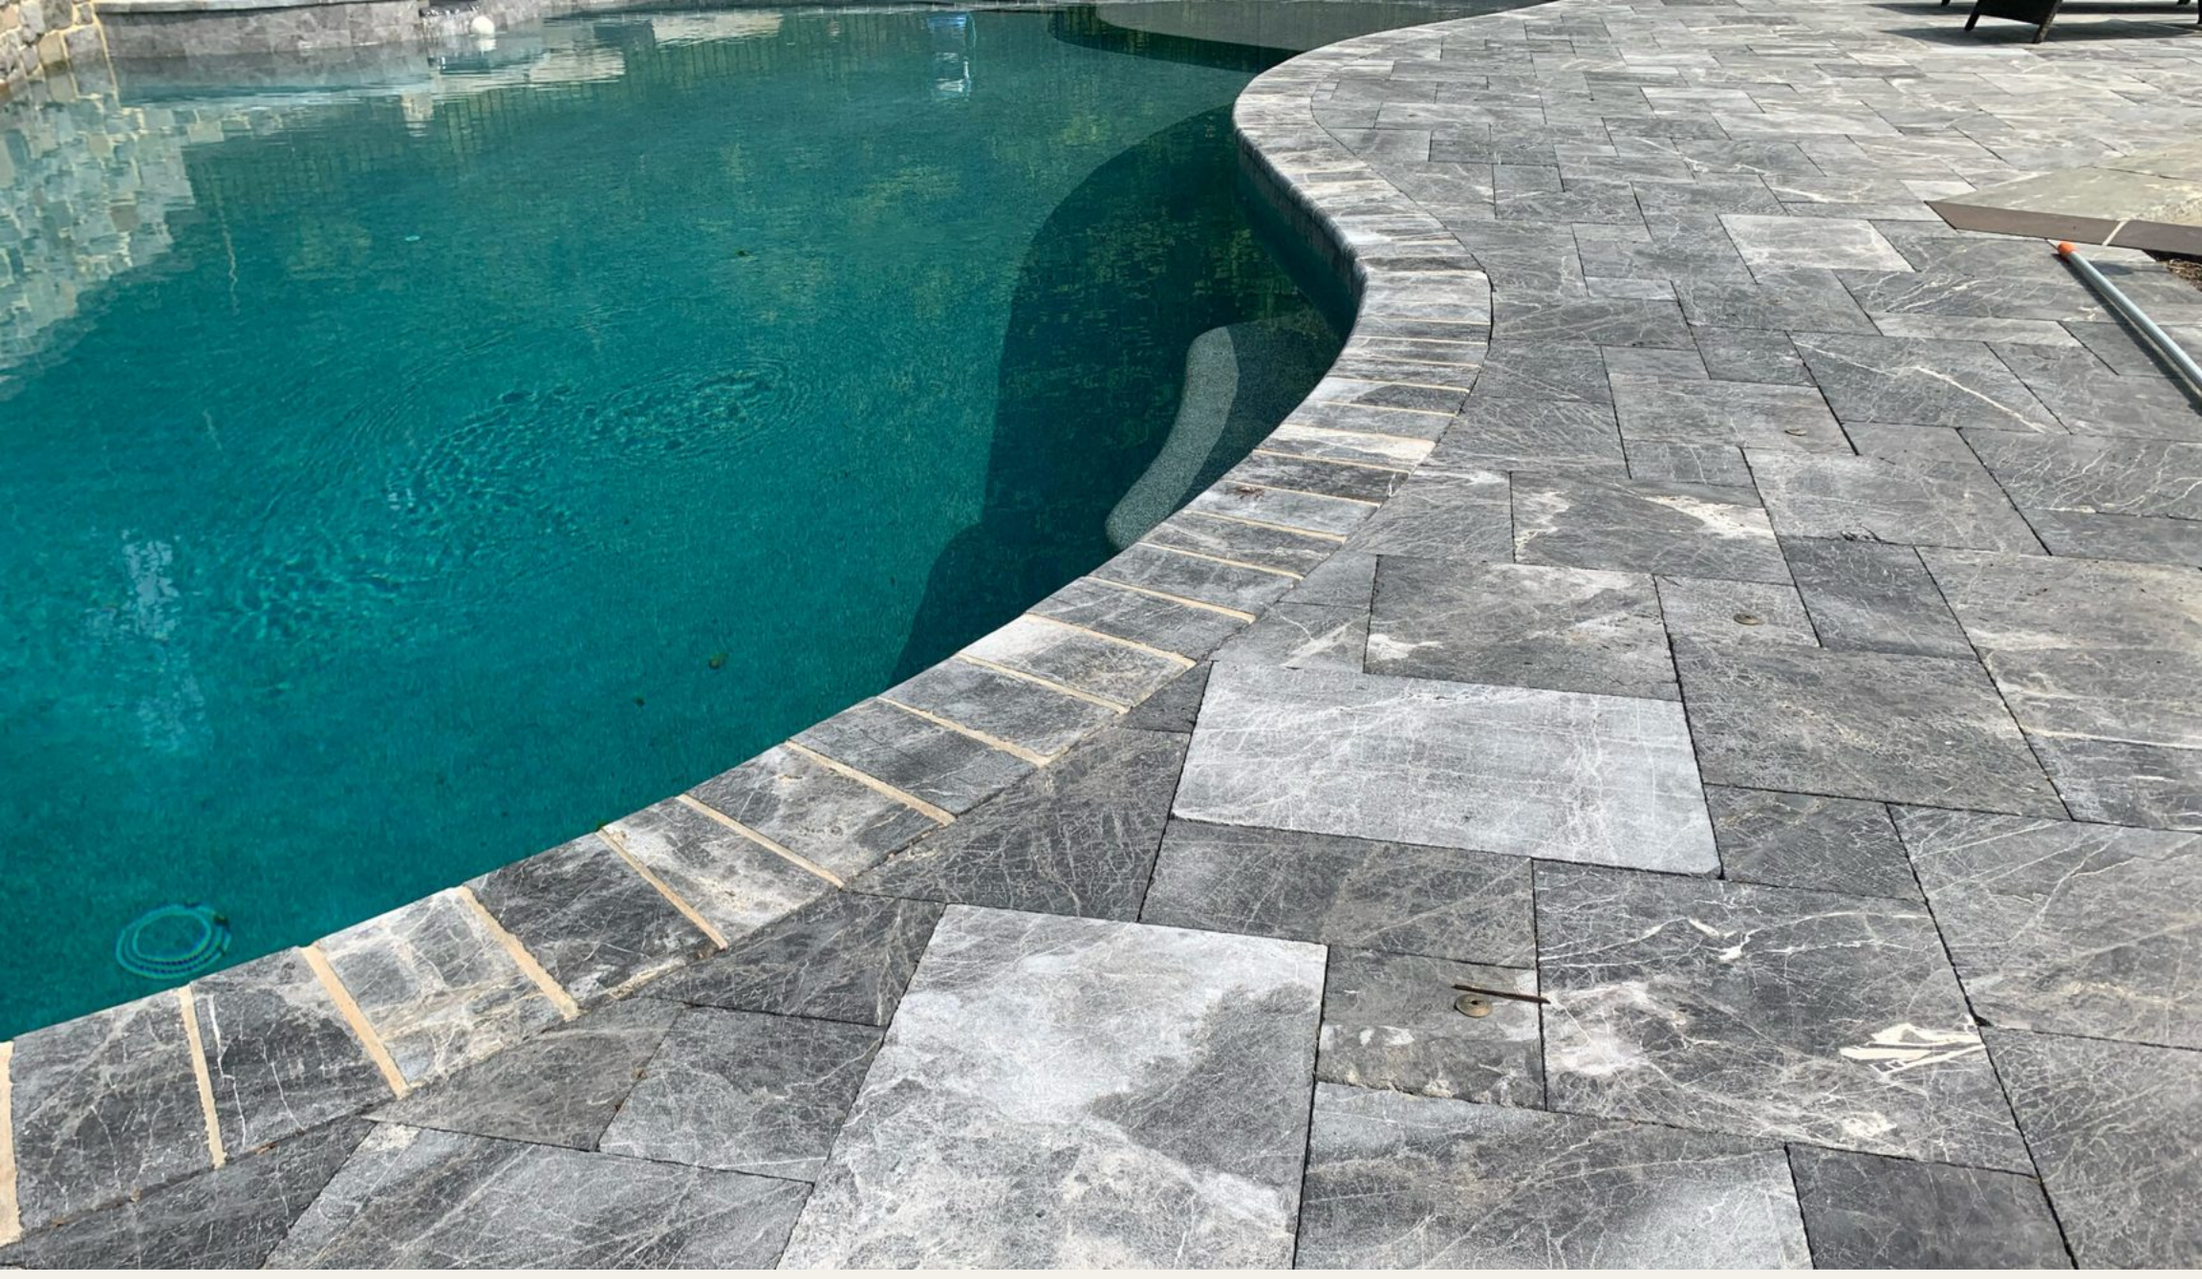

ELEVATION CREMA EDA / MARBLE PAVING, COPING & VENEER

Crema Eda. A softer palette.

Creamy beige marble with antiqued or sandblasted options. Paving includes 8 x 16 through 24 x 48 in. by finish, plus French Pattern; 1 3/16 in. thick. Coordinate the coping and veneer.

SUPPLIER PROJECT PHOTOGRAPH

ELEVATION ORCCA / CHARCOAL MARBLE WITH WHITE VEINING

Orcca. Depth at the waterline.

Vintage-textured paving in sizes from 6 x 12 to 24 x 36 in., plus French Pattern; 1 3/16 in. thick. Coordinated 2 in. coping includes 12 x 24, 12 x 48 and larger formats. Confirm the selected profile.

SUPPLIER PROJECT PHOTOGRAPH

Warm stone. An easy connection.

Travertine palettes for pool surrounds, patios and coordinated architectural details.

Elevation Avena

Creamy beige and tan. Antiqued paving: 8 x 16, 16 x 16, 16 x 24, 24 x 24 and 24 x 36 in., plus French Pattern; 1 3/16 in. thick.

Elevation Grano

Taupe, tan and gray. Antiqued paving: 8 x 16 through 24 x 36 in., plus French and Washington Patterns; 1 3/16 in. thick. Coordinated coping and wall textures available.

Supplier project photographs / confirm finish-specific formats, physical samples, coping profile and current availability with our team.

Carry the palette onto the wall.

Marble and travertine veneer selections coordinate with the pool and patio collection.

Crema Eda Ledgeline

Flats: 6 x 24 in. / 5/8-3/4 in. thick. Corners quoted.

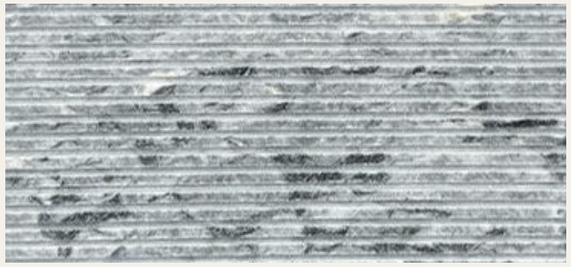

Orcca Ledgeline

Flats: 6 x 24 in. / 5/8-3/4 in. thick. Charcoal movement.

Grano Splitface

Antiqued texture / 6 in. high, random lengths.

Deep Blue Groove

Parallel linear texture / 12 x 24 x 3/4 in.

Crema Eda Bamboo

Fine striated texture / 12 x 24 x 5/8 in.

Carya Bamboo

Pale marble / confirm thickness and current cut program.

Supplier material photographs / architectural veneer faces a supporting wall; it is not a structural retaining system. Confirm attachment, moisture detailing and exterior suitability.

An unforgettable pool edge.

A beautiful pool deserves a complete stone palette. Shape the edge. Connect the deck. Carry the material through the spa, raised wall and the details that disappear into the design.

SUPPLIER PROJECT PHOTOGRAPH

One pool. A complete material story.

Elevation marble and travertine coping pairs with the paving and wall textures on pages 43-47.

Pale & architectural

Carya marble / a light gray palette with soft cream movement.

Warm & layered

Terra travertine / warm tans and browns for a richly textured poolscape.

Made for the edge

Crema Eda marble / bullnose profile. Straight and custom edge options also available.

FEATURED COPING	SELECTED FORMAT PROGRAM / INCHES
Crema Eda marble	2 1/4 thick: 12 x 24, 12 x 36, 16 x 24, 16 x 36 and 24 x 24. Sandblasted-only larger formats include lengths to 72.
Terra travertine	2 1/4 thick: 12 x 24, 12 x 48, 14 x 48, 16 x 24, 16 x 48, 24 x 24 and 24 x 36.
Choose the profile	Bullnose, straight and custom edges by selected stone. Corners, radii and finish-specific cuts quoted to the project.

Supplier project photographs. These are selected formats, not a universal size list. Confirm stone, finish, thickness, edge and current cut schedule.

PRODUCT DETAILS & FABRICATION OPTIONS >

The line that changes the whole pool.

Elevation marble pool tile connects the water, coping and deck with a quiet, continuous palette.

Afyon Cloud / a sculpted gray poolscape

Deep Blue

Marble pool tile: 6 x 6, 6 x 12 and 6 x 24 in.; 5/8 in. thick. Sandblasted or leather finish.

Afyon Cloud

Marble pool tile includes 6 x 24 in.; 1/2 in. thick. Sandblasted or leather finish. Coordinate the selected coping.

Photo shows a supplier pool project; sample images show stone character, not installed tile dimensions. Confirm the pool-tile assembly for the shell, water chemistry and freeze-thaw exposure.

PRODUCT DETAILS & FABRICATION OPTIONS >

An American classic. An exceptional edge.

Elevation Indiana Limestone / Full Color Blend coping with coordinated paving and garden walls.

PROFILE	PUBLISHED FORMAT
Bullnose	13 1/8 x 48 x 2 1/4 in.
Chamfered	12 x 24 x 2 1/4 in. or 16 x 24 x 2 1/4 in.
Surface	Smooth top / sawn sides in the Full Color Blend program
Complete the palette	Match the paving, then quote fabricated returns, corners and special transitions.

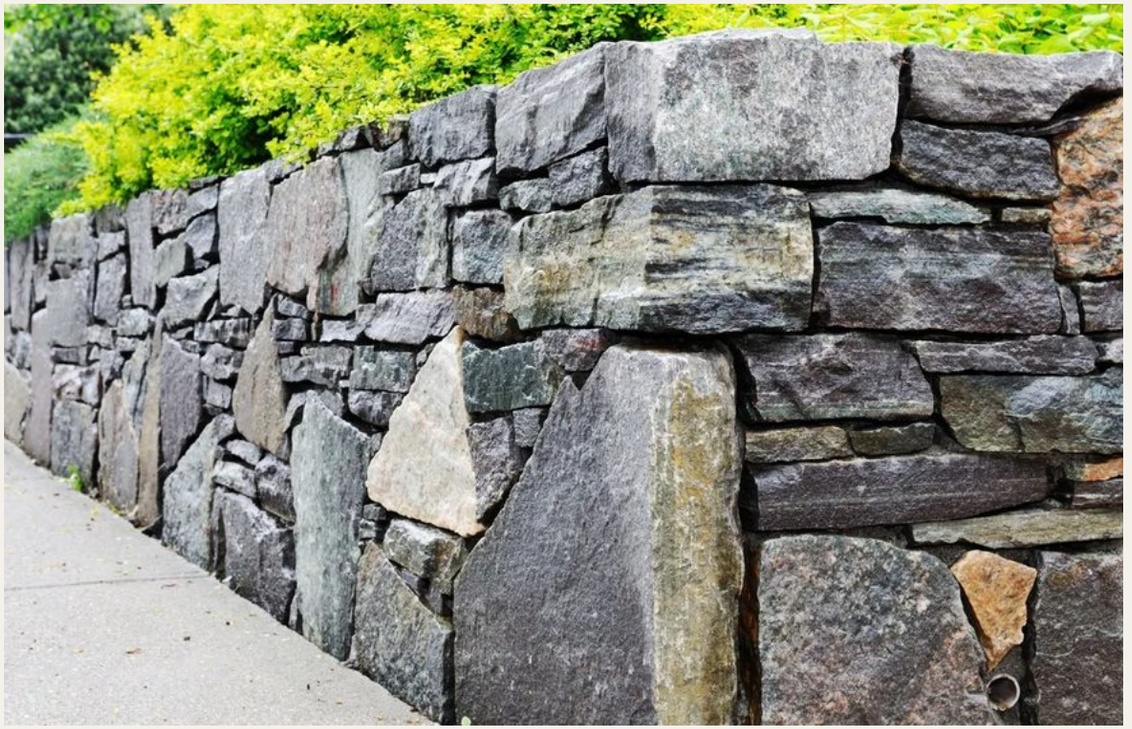

Long lines. Warm mineral variation. A restrained profile that lets the water and architecture take the lead.

Supplier project photograph. Listed dimensions apply to the published Full Color Blend program. Follow current limestone damp-proofing and installation guidance.

PRODUCT DETAILS & FABRICATION OPTIONS >

Bring Kansas character to the pool.

Elevation Kansas Limestone / a custom-cut approach to the coping, terrace and surrounding walls.

A landscape with substance.

Carry the natural limestone character from a garden wall to a made-to-order pool edge. Pair cream and buff stone with a quiet deck and rich planting.

Start with the stone.

Select the quarry range and review the proposed finish for the pool exposure.

Draw the complete edge.

Submit widths, lengths, thickness, overhang, corners, radii and every exposed face for fabrication review.

Coordinate the landscape.

Quote coping, wall caps and adjoining cut stone together. Pool coping sizes and profiles are project-specific.

Supplier Kansas Limestone wall photograph / material reference. Pool coping is a custom quotation subject to stone suitability and fabrication approval; no standard pool-coping size is implied.

PRODUCT DETAILS & FABRICATION OPTIONS >

ELEVATION ARCHITECTURAL LIMESTONE / CUSTOM POOL COPING

Precision in every curve.

Fabricated-to-order coping follows the pool in straight runs or radial patterns. Coordinate the stone, finish and adjoining deck to make the geometry feel effortless.

Custom dimensions, edge profiles and radii are reviewed from project drawings. Ask for matching cut-stone spa and wall details.

PRODUCT DETAILS & FABRICATION OPTIONS >

Quiet cream. Dramatic dark.

Elevation Cambrian Cream & Aqua Grantique / two distinctive pool-coping palettes.

Aqua Grantique / shot-blast surface

Dark mineral character for a strong pool perimeter. Coordinate the selected edge and deck finish, then detail the spa and water features as one composition.

Cambrian Cream / a softer edge

2 1/4 in. thick with thermal or shot-blast tops. A 3 cm height option is also published. Eased top-and-bottom edges with a tapestry finish, plus bullnose options. Edge faces are not thermal or shot-blast.

Supplier project and profile photographs. Cuts are project-specific. Confirm the selected material, thickness, top texture, edge treatment, corners and radii in the quote.

PRODUCT DETAILS & FABRICATION OPTIONS >

Even the cover box belongs in the design.

Coordinated cover-box pieces are available. Keep the material story continuous across the pool deck.

DETAIL	AVAILABLE PROGRAM / INCHES
Cover-box pieces	24 x 24, 24 x 36, 24 x 48 and 30 x 30; custom sizes to order
Skimmer covers	12 x 12 with 1 in. center hole; custom sizes to order
Drain covers	Custom to order
Pool corners	Standard 24 in. long returns; straight or radius; custom sizes and profiles

COVER-BOX PIECES AVAILABLE

Bullnose or straight edge / custom sizes to order

Bring the cover-system drawings.

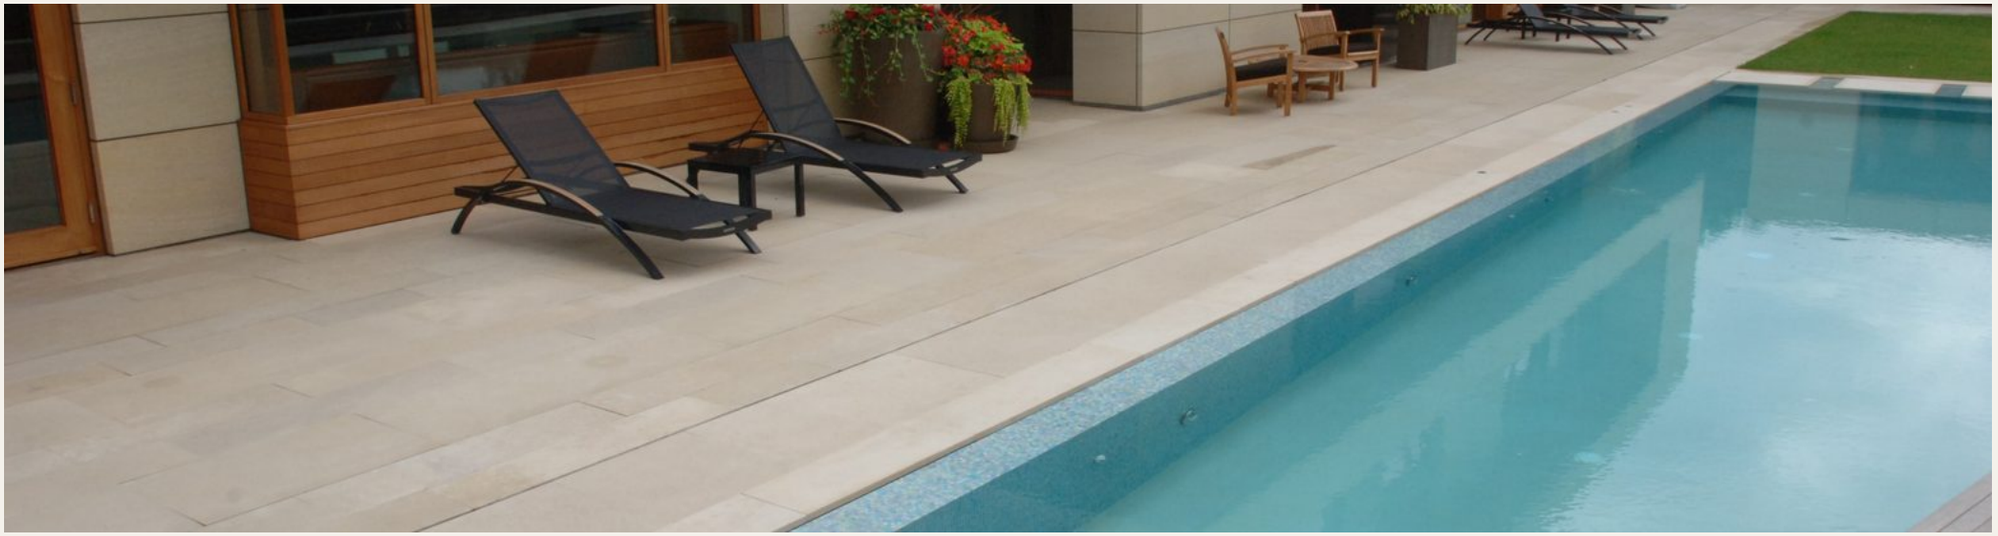

Confirm lid supports, span, piece weight, lifting access, track clearance and service removal before cutting the stone.

Supplier pool photograph is a palette reference; it does not depict a cover-box assembly. Accessory program is stone- and fabrication-dependent. Cover-system hardware and supports are coordinated separately.

PRODUCT DETAILS & FABRICATION OPTIONS >

Give the builder a complete palette.

Coping. Decking. Waterline. Spa. Cover box. One coordinated stone conversation.

ELEVATION COLLECTION	DESIGN OPPORTUNITY	QUOTE TOGETHER
Marble & travertine	Coordinated paving, coping and pool tile	Finish, profile, tile size and custom accessories
Indiana Limestone	Full Color Blend pool edge and paving	Standard coping, returns and adjoining caps
Kansas Limestone	Custom cut stone with landscape character	Stone selection, exposure review and cut schedule
Architectural limestone	Straight and radial fabricated coping	Radii, finish, edge and deck transitions
Cambrian / Aqua Grantique	Cream or dark textured pool perimeter	Top texture, edge face, thickness and corners

BUILD YOUR POOL STONE PACKAGE >

Dark stone. Strong geometry.

Basalt paving, columns and water-feature concepts from the website collection.

FORMAT	AVAILABLE OPTIONS
Gold Creek columns	1 1/2 to 5 ft. lengths in 1/2 ft. steps; 8-12 in. diameter
Red Bluff columns	2-10 ft. listed lengths plus 11 ft.+ inquiries; 10-18 in. diameter
Grand Coulee columns	2-10 ft. listed lengths plus 11 ft.+ inquiries; 18-24 in. diameter
Flamed basalt tile	12 x 12, 12 x 24, 24 x 24, 24 x 36, 24 x 48 in.; 3/4 in. thick
Honed basalt tile	12 x 24, 24 x 24, 24 x 36 in.; 1/2 in. thick; interior-focused
Natural selection	Confirm actual column dimensions, finish, weight and drilling

Confirm exterior suitability and installation for tile. Natural columns vary; piece selection, lifting equipment and water-feature detailing are project-specific.

TECHNICAL SOURCE >

Small details. Big atmosphere.

Boulders, pebble textures and fire-feature materials complete the landscape.

Decorative pebbles

Black Mexican Beach Pebble sizes on the website: 1/2-1, 1-2, 2-3, 3-5, 5-8 and 6-12 in. Compare the physical size range.

Fire-feature media

Black Fire Lava Pebble ranges: 1/2-1, 1-2, 2-4 and 4-6 in. Select size and depth to suit the approved burner system.

Statement stone

Benches, specimen boulders and one-of-a-kind stones. Review actual dimensions, exposed faces and installation access before selection.

Decorative landscape stone is not automatically fire-rated media. Follow the fire-feature manufacturer's instructions for compatible stone and installation.

TECHNICAL SOURCE >

The detail that holds everything together.

Choose the edge when you choose the paving, not after the field is installed.

MATERIAL / DETAIL	PUBLISHED FORMATS	RESOLVE BEFORE ORDER
Indiana / coping	12 x 24 or 16 x 24 x 2 1/4 in. chamfered	Corner pieces, overhang and visible ends
Indiana / bullnose	13 1/8 x 48 x 2 1/4 in.	Pool profile, radius and fabricated transitions
Indiana / wall cap	12 x 24 x 2 in.	Joint layout, edge return and drainage detail
PA Bluestone / tread	2-8 ft. lengths; 1 1/2 or 2 in. thick	Width, finish and exposed edge profile
Granite / custom cuts	Quote to approved drawings	Material, surface texture, thickness and lifting

Published formats are product-specific. Custom dimensions are subject to fabrication review and are not an inventory commitment.

Build a palette. Give it a point of view.

Three design directions from the Elevation Stone collection.

Warm modern

Indiana Limestone paving + Cambrian Cream walls + a restrained dark granite accent. Keep the modules large and the planting soft.

Mountain texture

Chestnut or Highland Brown walls + substantial natural steps + specimen boulders. Let the site determine the scale.

Blue-gray architecture

Thermal PA Bluestone + light architectural masonry + dark metal. Repeat the paving tone at the tread and wall-cap edges.

Pairing suggestions are design concepts. Approve all materials together in natural light, with both wet and dry samples where appropriate.

Find the right format.

A quick reference to the detailed pages. Dimensions are inches unless noted.

COLLECTION	SIZE / FORMAT SNAPSHOT	PAGE
Indiana Limestone paving	12 x 12 through 24 x 36; XL 24 x 48 and 36 x 36	18
Indiana coping & caps	Chamfered 12 x 24 or 16 x 24; bullnose 13 1/8 x 48	20
PA Bluestone pattern	12 x 12 through 24 x 36; thermal or natural cleft	23
PA Bluestone slabs	48 x 96; 1 1/2, 2 or 3 thick	25
Granite split-edge paving	4 x 4, 8 x 4, 8 x 8, 12 x 12; custom by quote	29
Granite wall block	14 x 10 footprint; 3 7/8 or 6 1/8 high	30
Wisconsin sawn-height walls	8 depth; 3 1/2 or 7 1/2 high; stone-specific	34
Wisconsin stone steps	18 or 24 deep; 3, 4 or 5 ft. lengths; stone-specific	36
Kansas Limestone	Custom-quoted sizes; approved cut schedule required	39-40
Basalt tile & columns	Flamed tile up to 24 x 48; natural column sizes vary	57

Dimensions shown are a selection of published options, not a universal stock list. Confirm actual vs. nominal sizing and the current product program.

Beautiful stone deserves a thoughtful installation.

Material, finish, thickness, support and drainage work together.

Start with the exposure.

Review freeze-thaw conditions, snow storage, moisture and winter maintenance. Confirm the selected stone and finish for its intended use.

Specify the complete assembly.

Match thickness, piece size, bedding or bonding, base, joints and drainage to the actual loads. Pedestal, mortar-set and aggregate-base work need different details.

Protect the stone.

Indiana Limestone paving guidance calls for cement-based damp proofing on the back and unexposed sides. Follow the selected product's current instructions.

Approve the surface.

Check texture for wet or icy conditions. Honed and polished finishes require application review. Use stone-compatible cleaners and approved winter products.

This catalog is a material selection guide. Project installation details and structural requirements are established by the qualified design and installation team.

Your palette. Your point of view.

Choose the sill with the veneer.

Coordinate the material, face finish and edge. Quote the sill dimensions with the selected veneer and corners.

S01

Indiana Limestone

Cream / buff palette. Custom sills and architectural cuts are quoted to approved drawings. Confirm length, depth, thickness and exposed faces.

S02

Dovewhite Limestone

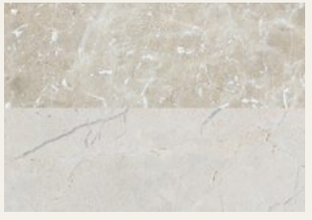

Light architectural dolomitic limestone. Sills are offered in random or specified lengths; profile, finish and fabrication dimensions are quoted.

S03

Gray Limestone

A cool architectural limestone direction. Pair with gray veneer or contrast against a warm wall. Confirm the proposed sill finish and edge profile.

S04

Crema Eda Marble

Published sill: 2 1/4 in. thick x 24 in. long x 4 in. deep. Bullnose, straight or rockface edges; other sizes custom to order.

Approve physical samples. Images show material character; not every image depicts a fabricated sill. Confirm slope, projection, drip, returns, flashing and installation details with the project team.

From inspiration to the final stone.

Bring the design intent. Leave with a clear material package.

01 / Select the range

Approve physical samples and the natural color variation. Ask for the proposed finish, not just the stone name.

02 / Resolve the cuts

Confirm actual dimensions, thickness, exposed edges, corners, radii, quantities and a coordinated cut schedule.

03 / Confirm the order

Review availability, lead time, freight, packaging and any custom fabrication terms in the written quote.

04 / Plan the arrival

Coordinate truck access, unloading equipment, stone weights, staging and inspection with the installer.

ABOUT THIS COLLECTION

Curated from the Elevation Stone website and supplier technical publications reviewed October 2026. This is a featured selection; the website carries the broader collection.

Photography includes Colorado architectural design concepts and supplier photographs. Concepts illustrate design intent and are not representations of completed Elevation installations. Natural material varies.

Published sizes apply only to the named product program. Custom options are quoted separately. Current written quotations and approved shop drawings establish the final order.

Technical references and sizing sources >

Technical source links are embedded on the relevant size and specification pages. Request the current cut sheets with your project quote.
